SUMMARY

I'm a beginner Frontend Developer from Belarus, Minsk. I have some experience in Backend Development and Design. Driven by a passion for elegant design solutions and a commitment to continuous improvement, I seek a role that fosters creativity and professional growth. I aim to bring clarity and innovation to every project. In the process of work I learn quickly and have a great desire for professional growth.

PROJECTS

Designer at Faculty Student Union

[Link to Instagram](#)

Student Union organises local events dedicated to different holidays or special days. Designers work on Instagram posts and stories (commercial as well), create printable products like posters, tickets, diplomas, faculty's brand clothes

Letter transformation web app

[Link to deployment](#)

Created first React App for university course. Task was to build our last name's first letter in 3 dimensions using only vertexes and represent it in 3 projections. Add ability to transform the letter.

Wordpress site

[Link to site](#)

In 3 weeks created and published Wordpress powered site from scratch without experience in platform. Covered all the work with databases, hosting and domain name.

EDUCATION

Sep 2018 - present	Chinese language and culture at Republican Confucius Institute of Synology
Sep 2023 - present	Applied Computer Science at Belarusian State University (GPA: 8.0/10.0)
