SUMMARY

Frontend Developer with 1+ year of commercial experience on a B2B fintech ERP/CRM platform (5 client companies, 3M+ records in core tables). One of three frontend engineers: I deliver features end-to-end, from API contracts with the backend to UI, state, business logic and release, on the current Angular stack (Angular 21, Signals, OnPush).

SKILLS

Core	TypeScript, JavaScript, Angular (Signals, RxJS, Akita, NG-ZORRO), HTML5, SCSS
Also	React (projects), REST APIs, Git (GitHub / GitLab), Figma
Academic	Go, C++
Languages	Belarusian (native), Russian (native), English (B2), Chinese (HSK4)

WORK EXPERIENCE

Frontend Developer (Angular) Aug 2025 – present

OxSoft — Sugarant, a B2B ERP/CRM platform for merchant cash advance (MCA) business: deals, payments, customer data. 5 client companies; frontend team of 3; Scrum.

- **Made 10+ list views over 3M+ record tables configurable per user:** global filter synced two-way with per-column filters, persisted across sessions, plus per-user column visibility, so users don't rebuild their views.
- **Built the platform's calendar from scratch** — schedule, events and invitations in a side panel without leaving the current screen: Day/Week/Month/Expanded views, all-day events, own Akita store.
- **Rebuilt the Participants and Syndicators modules** (deal investors and their payments) from Figma to production: list views, detail panels, payment logic, deal relationships.
- **Agreed API contracts with the backend team** for the features I own.
- **Implemented role-based UI access:** forms, actions and toolbars show each user only what their role permits.
- **Owned maintenance of production Twilio calling and SMS flows.**
- **Took part in the Angular v17 → v21 upgrade that cut build time from ~10 to 6 min:** migrated my modules to Signals, OnPush, standalone APIs and @if/@for.

PROJECTS

AgroTech Fertilizer prediction decision support system: built the React frontend on a Django REST API with ML models (XGBoost, Optuna).

EDUCATION

Sep 2023 – Jun 2027	Applied Computer Science at Belarusian State University (GPA: 8.0/10.0)
Nov 2024 – Aug 2025	Courses “Frontend/JavaScript”, “React” at RS School
2023	Yandex Lyceum (Go), Yandex Academy (C++ intro)
